Mr. Borah had voted for the bill when it contained the Clarke iod, but he voted against the bill when the amendment had been stricken out and, furthermore, he surprised the tributors to the campaign fund, and Senate by announcing that he had bescenate by announcing that he had become convinced that the great majority of the American people were

The Deutschland's dyes will be appraised by the New York customs offi-cials, they having had more exper-ience in such matters than the Balti-more appraisers. Samples are now being shipped to this city. The re-mainder of the product is being reway, ten per cent of the total being

kept in public storehouse in Balti-more pending the decision of the appraisers.

There is little chance that the cus-toms officials will find the dyes under valued. The valuation must be based on the market price in Germany. It has not been learned what that price is, but it is known that the original figure has been multi-plied many times since the war be-gan. The purchasers of the dyes in this city say that this price has been substantiated by reports from Germany and agrees with the valuation put on the shipment.

There are six distributers in New York, who are to receive the dyes from the consignees for distribution to the trade. These are the Badische Company, H. A. Metz and Company, the Bayer Company, the Kalle Color and Chemical Company, the Cassella Color Company and the Berlin Aniline Company.
